SURFACE TENSION RELIEVED MOUNTING MATERIAL

Abstract of the Disclosure

The present invention provides a mounting article having reduced or relieved surface tension for pollution control devices which utilize a monolith structure within a metal housing. The mounting article comprises a sheet material having major top and bottom surfaces, a thickness, a length and a width, said sheet material having at least one score-line in a surface of said sheet material. The present invention also provides a pollution control device comprising a housing, a pollution control element disposed within the housing, and a mounting article of the invention disposed between the pollution control element and the housing.
